**COMMENTS:** In a compliance inspection conducted on 03/31/2009, AQD staff observed activities at Fort Lauderdale Boat Club. The facility is a marina with boat repair, bottom work area, boat pull out, boat storage and offices. Ms. Kelly Ruff accompanied AQD staff on the inspection as well various company owners at the facility. Ms. Ruff stated that they will be eventually ending painting and body work at the yard, however at the time of the inspection the facility was still conducting it. Ms. Ruff showed AQD staff the VOC records and AQD staff did observe that there were a few months where the VOC lbs per day were 43 (close to threshold). However, Ms. Ruff let AQD staff know that would not be an ongoing occurrence and those contractors would be leaving the yard in 60-120 days.

Housekeeping was better at the yard and all vessels were observed encapsulated in tarps. One contractor had recently obtained a containment vessel for his resin drum (the facility utilizes some resin which is tracked in records).
