COMMENTS: The purpose of the visit was an annual inspection. We found the following: 1. The record keeping of the Perc purchases was very good and organized. 2. The gauge temperature reading was recorded weekly and the average was 5°C and none of the recording was over 7.2° C. 3. The vicinity around the dry cleaning machine was very clean and well maintained. 4. The Perc was loaded directly with a hookup connection. No container of perc was at the site. 5. The monthly average for perc consumption was recorded correctly and the total for past 12 months was 0.00 gallons and it was verified.					
 6. The machine was in operation today. No leaks or odors were noticed. 7. The waste from the dry cleaning machine was properly store in the tight lid containers to be disposed in accordance with solid waste regulations. 8. This Facility is classified as a small area source.
