COMMENTS: The purpose of the visit was an annual inspection. We found the following:

- The record keeping of the Perc purchases was very good and organized.
- The gauge temperature reading was recorded weekly and the average was 40°F and none of the reading was above 45°F.
- The vicinity around the dry cleaning machine was very clean and well maintained.
- The Perc was loaded directly with a hookup connection. No container of perc was at the site.
- The monthly average for perc consumption was recorded correctly and the total for past 12 months was 130 gallons and it was verified.
- The machine was in operation. No leaks or odors were noticed.
- The waste from the dry cleaning machine was properly store in the tight lid containers to be disposed in accordance with regulations.
- This facility is classified as a small area source.
