4. Was the required test report filed with the department as soon as practical, but no later than 45 days after the test was completed?----- Yes No

PART III: OPERATING/RECORDKEEPING REQUIREMENTS – Rule 62-210.300(4)(c)2., F.A.C.

(check appropriate box(es))

1. Is this facility: 1) a stationary ; 2) a relocatable ; or does it have: 3) both, stationary and relocatable concrete batching and/or nonmetallic mineral processing plants? (*Please check only one box.*)
2. If this is a stationary concrete batching plant, is there one or more relocatable nonmetallic mineral processing plants using individual air general permits at the same location? (*If your answer to this question is YES, then proceed to questions 2.a), thru 2.d,) below.*)----- Yes No
- a) Are there any additional nonexempt units located at this facility?----- Yes No
- b) Is the total combined annual facility-wide fuel oil usage of all plants less than 240,000 gallons per calendar year?----- Yes No

COMMENTS: The yard and roads are all dirt at this facility. The inspector, Ilka Bundy, requested that the facility water the yard since vehicular movement was causing dust to go up into the air. The plant personnel watered right away using a front-end loader. Water was on the aggregate piles and had wind breaks. The drop point to the trucks had a chute and spray bars to help control dust at the drop point to the batching trucks. The flyash tanker unloaded 24.82 tons in 50 minutes, or 29.78 tph. The cement tanker loaded 26.91 tons in 50 minutes, or 32.29 tph. The observed opacity for all emission units was zero percent. The inspector, Ilka Bundy, did observe one puff from the northmost baghouse on top of the cement silo. No objectionable odors were detected. Unconfined emissions from vehicular movement was not leaving the property.
