COMMENTS: In a compliance inspection conducted on 03/30/2010, AQD staff observed operations at Billfish Marina. This facility is a marina that primarily conducts bottom painting. Mr. Rich Vanlenten accompanied AQD staff on the inspection. Mr. Vanlenten submitted the VOC records and the facility is below its VOC/lbs per day threshold. They average about three to eight pounds per day of VOC's.

Housekeeping at the facility was very good and Mr. Vanlenten makes an effort to ensure that his staff adheres to the Marina BMP. One contractor was utilizing a sink near the waterway for handwashing, and upon request did locate it immediately to prevent any unnecessary to discharge to the waterway.

Mr. Vanlenten was also working on the stormwater plan for the facility and was making an effort to address all the questions that Broward County EPDGM had asked him.
