COMMENTS: I was met at the facility by Ms. Krus Retherford who accompanied me on a physical inspection of the plant. I was provided information on the use of resin and gelcoat used during the of November 2007 through October 2008. This information indicated that the facility used a total of 86,800 pounds of material in the proceeding 12 month period. This exceeds the facility's maximum permitted limit of 76,000 pounds in any consecutive 12-month period.

Ms. Retherford told me that she has hired a consultant to apply for a title V Air Operating Permit.

This facility is in Significant Non-Compliance status because it is operating without a valid permit for the amount of gel-coat and resin it is using.
