**COMMENTS:** Mr. Talley failed in his attempt to produce a proper throughput for this facility. Although he is the plant manager, he was not able to produce the report. What he was able to produce showed that this facility received less than million gallons of fuel for the year, below the GP threshold of 46 million gallons. Mr. Talley also generated another report that showed this facility sold 4.5 million gallons of fuel which included the gas station next to this facility. There were no violations observed during this inspection.
