**COMMENTS:** In a compliance inspection conducted on 06/08/2006, AQD staff observed activities at Vinsons Auto Body Facility. AQD staff was accompanied by Todd Sagnella (manager) on the inspection. The facility has one automotive spray booth and one secondary containment room (very well maintained).

AQD staff reviewed VOC records with Mr. Sagnella on-site and he also submitted MSDS sheets and paint usage records to the department later that day. He is under his permit threshold and is at .78 VOC/lbs/day. AQD staff also informed Mr. Sagnella that he would need to renew his permit in August, 2006 and at that time may be subject to a permit review (which could take into account his potential to emit instead of actuals).

Mr. Sagnella was very cooperative and overall housekeeping at the site was good.
