COMMENTS: I followed Mr. Robert Eaton, Regional Environmental Manager, Mr. Andy Workman, Plant Manager, Mr. Chis Black and Mr. Jason Circello from my inspection of the Lafarge Panama City plant to the Panama City Beach plant. Where they escorted me on my inspection of the plant and provided me with all requested records. This plant produced approximately 1,180 tons of concrete in the 12-month period from January 1, 2008 through December 31, 2008. The plant was in operation at the time of this inspection. The area around the plant was very clean and I did not observe any fugitive emissions even though it was a relatively windy day. The last visible emissions test was performed on May 28, 2008 with the test report received by the Department on June 4, 2008. The opacity level as stated on the test report was 0% opacity. As in my Panama City plant report, I would like to comment on the environmental training schedule that the Lafarge Corporation has instituted. This training schedule consists of planned monthly meeting on various environmental topics. I commend the Lafarge Corporations apparent emphasis on insuring its plants operate as good environmental stewards.
