**COMMENTS:** The facility had been in operation for over 30 years . The facility was purchased by its present owners around March of 2006. VE testing was performed in January of 2007 and indicated that the facility is in compliance with applicable standards.

T his facility has a water truck which is used as needed to wet down the access roads

There were no visible emissions noticed from the rock crushing operations nor would any be expected since the facility handles the rock wet.
