**COMMENTS:** On July 21, 2010 I visited this facility to conduct the annual compliance inspection. On site I met Mr. Michael Field, the owner of the facility. This facility manufactures and designs fiberglass automotive parts and molds. There is one paint spray booth with 32 exhaust filters and all of them are in good shape. Paintbooth is mostly used for fiberglass grinding. No gelcoat was used in last year. Approximately 50 gallons of resin was used in the past year.
